SPECIÁLNÍ MANIPULACE | TECHNOLOGIE FLOWDRILL

Norbar NB 18120.B06

Popis produktu:

Pneumatic Multiplier, 500 N·m, Bi-Directional, Shut-Off External Control, 3/4" square drive; PneuTorque PTM-52-500-B-EC

The PTM-52 is engineered to be one of the lightest and fastest tools of its type on the market. The exceptionally compact 52mm diameter gearbox means that the tool is well balanced, light weight and provides excellent access to bolts.

The integration of electronic torque measurement and control into the PTM-52 Series is achieved with the minimum impact on overall tool size and weight.

Shut-Off, External Control incorporates a transducer, solenoid valve and three coloured LEDs for the indication of low, within tolerance and high results. All control functions and torque display are housed in an external controller unit (purchased separately).
