

Wiha – Top products for your success

What distinguishes good hand tools? One thing above all: their ability to make your job noticeably easier.

If they also protect your health, ensure your safety and meet the highest quality standards for a sustainable, long lifespan, we call them outstanding – or in short: Wiha hand tools.

We present to you our TOP sellers 2025 that have proven to be the best of the best in criteria such as user benefits, application options and flexibility, demand, potential for individual further development, level of innovation, or customer feedback. Use our products to guarantee your success – now!

The complete and comprehensive range of Wiha products can be found at www.wiha.com or in the digital catalog of Wiha (www.wiha.com/digicat).

Wiha – Tools that work for you

- 85 years of German family tradition
- Wiha Qualität für professionelle Kunden weltweit
- Manufacturer of highest quality hand tools and solutions ensuring the success of users and trade partners
- Numerous national and international awards prove the company's claim to leadership in the industry

Wiha - A company and its people. Today and in the future.

How do we define corporate success? We focus just as much on sustainable corporate and organizational development as we do on individual development, freedom, and further development of our employees, customers, and partners. At home in the heart of the Black Forest, the responsible dealing with nature comes naturally to Wiha. We consciously place this aim above the maximization of sales and profits.

Our corporate culture and all organizational processes and aims are founded on the central values of responsibility, respect, and integrity.

Wiha as a partner for the future

- **Promotion of employees**
We support them in their further development and create best working conditions.
- **Active exchange with users**
Through close contact and constructive exchange we can accomplish our goals together.
- **Acting responsibly**
We live the principles of social responsibility and obligation to support our suppliers.
- **Reliable partnership**
Our active and personal partner management with the specialist trade creates a trusting sense of togetherness and care for each other.
- **Social commitment and cooperation**
Long-term partnerships with local educational and social institutions establish our place in the middle of society.
- **Committed to sustainability**
Products with a long service life, resource-saving processes, goals for minimizing waste, energy use, and emissions are part of our holistic sustainability strategy.

Wiha design awards

Ergonomics, highly prized by all.

To us, positive feedback from people for whom we make our tools is the most rewarding confirmation of our work. All the same, we can also be more than a little proud when the high ergonomic quality of our products is confirmed at the "highest" level, as many of them have been distinguished with coveted design awards. In addition to this, our company and production quality were also honoured with awards. With this praise and confirmation from every direction, it's no wonder that Wiha are on the right track with ergonomic tool concepts and a future-oriented philosophy.

Wiha tools with AGR approval

The world's first tools bearing the seal for efficient and health-friendly work

Tested and recommended by the forum: Gesunder Rücken - besser Leben e.V. and the Federal Association of German Back Schools (BdR). More information from: AGR e.V., Aktion Gesunder Rücken e.V., Stader Str.6, D-27432 Bremerförde, Tel. +49 4761 926 358 0, www.agr-ev.de

Certified ergonomics: The Wiha SoftFinish® screwdrivers with their handle size concept, the electric screwdriver speedE®II as well as the tools case XXL4: It is awe-aspiring to be the world's only hand tool manufacturer to have products honoured with the renowned AGR seal of approval. Very few everyday objects are able to pass the stringent tests of the AGR, whose seal enjoys broad acceptance by medical professionals for very good reason.

For many years, the AGR has been dedicated to promoting and researching the prevention of back pain. It also offers recommendations on products that help to prevent musculoskeletal disorders and back pain.

Wiha has been acknowledged for its ergonomic screwdriver handle size concept, the speedE®II electric screwdriver and the tool case XXL 4. To us this recognition is a confirmation of our corporate philosophy – to develop tools enabling professionals not only to work efficiently, but also in a health-friendly way.

Wiha's screwdriver handle size concept features four handle heights and lengths, each optimally adapted to its specific fastening or work task to ensure health-friendly work practices. The speedE®II with its electric drive ensures that the joints and tendons are not strained during extensive

repeated fastening jobs. On top of that, Wiha offers a tool case with many ergonomic advantages – the foldable legs ensure a raised and therefore more comfortable removal of the tools. In addition, work in low positions can be carried out while seated. Vice versa, work in high positions is also no problem thanks to the slip-proof step. The large case rollers additionally ensure that the case can be pulled easily across rough terrain and stairs. When carrying or stowing the case in a vehicle, the two-component handle on the left side ensures comfortable carrying close to the body. Finally, two gas-filled shock absorbers prevent uncontrolled closing of the case lid.

Wiha SoftFinish® handle sizes

Every Wiha handle optimally balances guidance, speed and torque for the respective fastening task.

Quick-turning - Motor skills are consistently taken into consideration.

Maximum power transmission, comfortable to use and without loss.

VDE-insulated tools from Wiha

To work safer, more efficiently and with less strain on the body.

Certified safety – from our own safety testing procedure according to IEC standards.

Voltage testing: All Wiha VDE-tools, which have special markings, are individually tested at 10,000 V AC and are approved for 1,000 V AC and 1,500 V DC.

Cold shock test: Cooling down to -25°C . The skinning material must retain its toughness, so that it doesn't break when subjected to shock and knocks.

Test of electrical skinning properties: 24 hours storage in water, then 3 minutes test at 10,000 V AC. There must neither be flashover nor disruptive discharge.

Test of the adhesion of the skinning material coating: 168 hours storage at 70°C , then test of adhesion at 500 N.

Pressure tests: Test at 20 N pressure load, 70°C temperature and 5,000 V AC test voltage. No disruptive discharge may occur.

Test of combustion behaviour: The tools are subjected to a flame for 10 seconds. The skinning material must then extinguish and not continue to burn.

As an internationally recognized institute, the VDE is responsible for the testing and certification of electrotechnical products. Wiha provides the professional with a broad range of VDE products, developed and continuously optimized specifically for electricians, which also provide application oriented solutions for everyday use.

The Wiha quality-management system according to ISO 9001:2015 ensures that only first-class products are manufactured – and that you can work with products of excellent quality. To ensure maximum safety for the user, the entire Wiha VDE range must undergo the most stringent inspections and individual tests. All Wiha VDE-tools hold multiple certifications: The VDE-GS mark stands for safety with regard to any risk, from electrical right up to radiological. Products labelled with a double triangle and a voltage range are suitable for work with live parts.

The international standard IEC 60900 defines the construction, safety as well as single, series, and random testing of insulated tools. But with Wiha you don't just work safer, but also healthier and more efficiently. Specially developed ergonomic geometries ensure comfortable handling that protects the body from strain. The result: easier work, less signs of fatigue, more efficiency.

The range

Designed for those who work with it.

User experiences are incorporated into Wiha tools right from the product development stage. This resulted in high-quality tool sets that are produced for mechanics, electricians and electronics technicians which have been specifically assembled for different requirements. Neatly tucked away and clearly organised in robust, compact tool bags, tools are ready at hand, ensuring work is completed easily and efficiently. Wiha tools prove to be very handy, essential companions especially when stored in a tool case. The shortcomings of standard tool cases were amended – thanks to its practical tool inserts and extra storage space for small parts, the Wiha tool case provides simple, no-load tool transport. Even more comfort and every type of support for mobile applications is offered by the Wiha tool backpack, because for some tasks you need to have your hands free.

"A case with all major Wiha tools and innovations - like Christmas for the electrician!"

Electro

Safety for professionals.

Quality and precision from one source. All devices convince by the highest measuring accuracy and the best quality not to mention the typical features functionality and durability of Wiha. The "Electrical" product group presents itself with a range of Wiha innovations, starting with the torch, the e-screwdrivers and the measuring device series: from voltage testers to multimeters, from rotary field indicators to ammeters. Wiha offers exactly the right tool for a wide range of applications.

"The speedE[®] PocketDrive is a real all-rounder that I can rely on completely. Whether large or small screws, powerful or fine - I decide what is needed at the touch of a button. Thanks to its compact size and shadow-free lighting, it supports me in everything I have to do."

Screwdrivers

We have the know-how at the tip of our fingers.

The ergonomic quality of a tool is never quite so apparent as when fastening and clamping. Under the motto "A grasp on turning" Wiha presents an innovative handle size concept which breaks new ground in terms of individual user comfort. Many commonly available screwdrivers are not designed to meet the needs of users. This results in disadvantages in guiding the tool as well as in transmitting force while fastening. In contrast, the- Wiha SoftFinish® concept works with four different handle sizes: Thus, each handle has a perfectly correlated ratio of guidance, speed and torque for any task. With SoftFinish, Wiha became the world's first and only hand tool manufacturer to have products honoured with the renowned AGR quality seal - a seal of approval accepted by medical professionals and officially recommended by doctors and therapists. Wiha screwdrivers featuring SoftFinish are available for dry applications, damp and oily applications and as VDE-certified, insulated screwdrivers for use when working on live parts.

**Wiha screwdrivers - for
handicraft, industry,
electrics and model-
making**

Torque tools

Controlled power for greater security.

The correct torque prevents damage to materials, eliminates the need for retouching and protects against warranty claims. This makes fully certified Wiha torque tools essential for mechanics, electricians and electronics technicians as they combine precision with security: with a release accuracy of $\pm 6\%$ for the pre-set scale value, Wiha torque screwdrivers satisfy standard precision requirements. Guaranteed individual item testing using the manufacturer's inspection process and individual item marking with an identification number attest to the high quality and manufacturing standard of the tools.

In most modern industrial and production units today, process and application safety is one of the top objectives. For example, the use of Wiha torque tools during the replacement of reversible plates can prevent follow-up work, prevent material damage, save time and ensure quality.

Multitools

Many talents in the minimum space.

Less tools mean lighter loads, better handling and efficient work. Therefore, the more functions a single tool offers, the better: Wiha multitools are compact, versatile tools that save space and ensure lighter loads, making them the perfect companion, particularly for mobile use. In the Wiha magazine bit holder LiftUp, the most commonly used bits are neatly stored in the handle, ensuring they are always ready for use and easy to handle. The PocketMax® can additionally be carried directly in a shirt or trouser pocket. The Wiha reversible blade system offers a variety of interchangeable blades, the lengths of which can be adjusted as required. The small, compact Wiha PocketStars contain the most commonly used L-keys – indispensable helpers for all equipment. The Wiha Stubby magazine combines six drive formats in one, allowing excellent access to all many confined spaces thanks to its extremely short screwdriver handle. With the multitools from Wiha you are excellently prepared for a multitude of applications.

Multitools are portable all-rounders for when you are out on the road, no matter where you take off from.

L-keys

Difficult to access - easily solved.

Wiha L-keys are essential for all users who are faced with a screw fastening task in difficult work conditions. Wiha ball-end tools enable fastening at angles of up to 25° per side. The risk of an accident is reduced since the tool does not slip out of the screw. Screws made of steel and non-magnetic materials are securely held in any position with the Wiha MagicRing and MagicSpring. Perfect order and easy handling - the ErgoStar L-key holder provides both: Rotating a single L-key in the holder means that all other keys rotate at the same angle! Keys sitting next to each other no longer need to be disentangled. Instead, all keys are ready for removal with one turn - as fast and easy as never before.

**Exceptionally neat.
Exceptionally bright.**

- Illuminates under UV light
- Easy to find with UV light
- No more long searches
- Wiha torch as perfect supplement

**INFOBOX:
ErgoStar**

- Secure fit thanks to innovative clamping
- Quick selection - Easy removal
- Well organized storage
- Compact and space-saving

Bits

The indispensable three.

Which machine? Which application? Which bit? The revolutionary Wiha bit concept puts an end to any confusion and presents three bit types which can cover all areas of use. Only the screw shape is crucial for selecting the bit. The Y bit is ideal for fastening wood screws with an angle no greater than 90° between the thread and screw head. The T bit is used for metal screws at a 90° angle. If you need to fasten both screw types, then the TY bit is the right choice since this universal bit is suitable for all type of fastenings. A selection of different bit holders and bit boxes such as the BitBuddy® and XLSelector ensures optimum usage of bits.

The right bit instantly - Which bit do I need for this job? Is this all too familiar to you? We're putting an end to that! From now on, choosing the correct bit is a matter of seconds.

INFOBOX:
BitBuddy 29

- One hand operation a
- Simple and rapid bit removal b
- Simple return of the bits c
- Compact and space-saving

Mechanical Tools

Tight fastening – easy opening.

Tightening and installation work requires many different profiles. Wiha offers the right equipment and its insulated ratchet wrench set ensures safe working in the electrical engineering sector. With the various nut driver and bit sets, as well as ring ratchet open-ended spanner sets, screw connections of all types can be easily fastened and opened. The extensive equipment range extends from a SoftFinish® screwdriver with a magnetic bit holder, various bits and bit holders, up to ratchet wrenches, extensions, and universal joints. The range is complemented by various ring ratchet open-end spanners. When it comes to flexibility and efficiency, the ratchet wrenches from Wiha are particularly distinguished by a variably selectable rotational direction as well as fine gearing with 72 teeth.

"With the ratchets and spanners from Wiha, I am simply well equipped for all screwing tasks, being for industrial assembly, heating installation or privately on my car."

Pliers

A cut above the rest for your health.

Wiha pliers combine high-quality materials with ergonomic comfort. Precise interaction between the joints and the exact workmanship of the blades and gripping surfaces ensure optimum functionality. Ergonomically designed and crafted to a high quality standard, they are comfortable to use, causing less body fatigue and thus making work more efficient. The "OptiGrip" triple-point support design for combination and high-leverage combination pliers ensure an optimum, secure hold when handled. The circlip pliers from the Classic Series with their MagicTips® precision tips made of high-performance steel provide added safety and stability. Wiha also supplies suitable tools for stripping, skinning and crimping.

"Thanks to the multifunctional pliers 8in1 from Wiha I can carry out almost all work steps of installing an electrical socket with a single tool. This makes my individual work steps quick and efficient while saving space in my tool bag."

Timo Schweitzer

Striking and measuring tools. Optimum force transmission.

With optimally uniform weight distribution, the Wiha electric hammer strikes a perfect balance and is also eminently suitable for use in confined working environments. Removing nails and nail clamps as well as fixing cables and dowels into position without causing damage become extremely simple tasks. Wiha's scaled impact screwdriver blade ensures that the portable dowel racket makes a perfectly dimensioned dowel hole to the required depth anywhere at any time without making a mess, unlike power tools. Wiha measuring tools prove to be further dependable helpers during electrical installation work. The Wiha electrician's spirit level allows users to easily mark spaces for up to four flush boxes. This spirit level stands out due to its effortless dimension measurement and perfectly visible bubbles.

"The Wiha spirit level is a big hit! I can see the bubbles perfectly even when taking measurements above my head."

Ralf Kästle

Soft-faced hammer set "Safety"

- 1 x Face hard round for soft-faced hammer „safety“
- 1 x Face very hard round for soft-faced hammer „safety“
- 1 x 6.0 mm
- 1 x Metal Box

GS tested.

INFOBOX:

Colour code system for Wiha hammer faces

Hammer face	Application range
soft (blue)	for sensitive materials, such as those in furniture and interior construction, minor assembly. Material: elastomer.
medium soft (black)	for robust work, such as paving, tiling, dry wall installation. Material: rubber.
medium hard (yellow)	universal use, such as for tool and machine manufacture, car repairs, sheet metal and assembly work. Material: polyurethane.
hard (orange)	for high stress mechanical tasks such as assembly and dismantling work, building and construction work, repair work. Material: cellulose acetate.
very hard (white)	for high impact work, heavy industry and construction, mould construction, road construction, horticulture and landscaping. Material: polyamide.

	Cold impact test
	Test of electrical insulation properties
	Pressure test
	Test of the adhesion of the insulating material coating
	Testing the burning behavior
	Tested safety

Ranges

	Case strength
	Wheel-along case
	Case shape
	Automatic air compensation valve
	Recommended by doctors and therapists from the German Campaign for Healthier Backs
	DynamicJoint® - Innovative unique joint design
	Actuating tool for spring clips
	Heavy-duty diagonal cutters with DynamicJoint®
	OptiGrip - Three-point support
	Access to low-lying screws
	1/2 inch
	3/8 inch
	1/4 inch
	Suitable for eMobility
	Plenty of storage space
	Stable stand
	Well organised, easy to remove
	Sturdy, waterproof bottom tray
	Many storage options
	Separate laptop/office compartment

Electro

	LED light		Flexible cable
	UV light		Millivolt range
	Laser for positioning		Voltage check despite empty battery possible
	Hands free thanks to retaining clip		Signal tone that can be switched on and off
	Hands free thanks to magnet		Suitable for testing house photovoltaic systems
	Recommended by doctors and therapists from the German Campaign for Healthier Backs		Suitable for testing large-scale photovoltaic systems
	3x faster than manual fastening		For connector types C and F
	Material protection function switchable 0.4 / 1.0 Nm		Integrated torch function
	Material protection function 0.4 Nm		Signal tone
	2x faster than manual fastening		Effective value specification for AC circuits
	Work safely up to 1,000 V AC		Work safely up to 1,000 V AC
	Electric drive		Optical light signal
	Manual screw tightening		Battery status display
	Standard rechargeable battery		Hands free thanks to retaining clip
	Access to low-lying screws		Compact and space-saving
	Expandable and compatible with EVF products		Daylight white (6500 K)
	Suitable for eMobility		Neutral white light (4000 K)
	Automatic switch-off function		Lumen
	Rotary field measurement (2 test probes)		Automatic switch-off function
	Rotary field measurement (3 test probes)		On/off sensor
	For testing hybrid and electric vehicles		
	Residual current circuit breaker function test		
	Very loud signal tone		

Screwdrivers

-  Access to low-lying screws
-  Recommended by doctors and therapists from the German Campaign for Healthier Backs

Torque

-  Precision +-6%
-  Precision +-10%
-  Access to low-lying screws
-  Material protection function
-  Actuating tool for spring clips

Multitools

-  Quick access
-  Compact and space-saving
-  Automatic opening
-  Double bits
-  Recommended by doctors and therapists from the German Campaign for Healthier Backs
-  slimTechnology access to low-lying screws
-  Actuating tool for spring clips
-  Variably adjustable blade length

L-keys

-  MagicRing® - Holding function without magnet
-  MagicSpring® - Holding function without magnet
-  Ball end can swivel up to 25°
-  TORX® ball end; can swivel up to 25°
-  Visible in UV light
-  Quick and easy access
-  Compact and space-saving
-  Two-component handle
-  Continuous blade

Bits

-  Suitable for impact screwdrivers
-  Lifespan 120 times longer
-  Visible in UV light
-  Compact and space-saving
-  Automatic opening

Mechanical Tools

-  Incl. holder
-  Fine toothing
-  15° angled mouth position - Perfect for confined spaces
-  Right/left rotation
-  Reduces the risk of injury
-  Recommended by doctors and therapists from the German Campaign for Healthier Backs
-  1/2 inch
-  1/4 inch
-  3/8 inch
-  4in1
-  Reduces the risk of injury
-  10° angled
-  30° swing-back angle

Striking and measuring tools.

-  Optimal weight distribution
-  Soft hammer end
-  Levers out nail clamps
-  Fully encased
-  Visible from just 10°
-  Recommended by doctors and therapists from the German Campaign for Healthier Backs
-  Optimal weight distribution
-  No recoil
-  Fibreglass-reinforced material

Torque

-  Impact protection
-  Optimum grip
-  Visible in UV light
-  Hollow handle - Perfekt balance

Pliers

-  Stripping area
-  Cutting-to-length diameter
-  Length stop
-  DynamicJoint® - Innovative unique joint design
-  Heavy-duty diagonal cutters with DynamicJoint®
-  OptiGrip - Three-point support
-  Cutting-to-length, stripping, skinning
-  2 functions 1 tool
-  2 power stages
-  Rotatable by 360°

-  Automatic adjustment
-  Rust protection
-  Work safely up to 1,000 V AC
-  Holding function
-  Square crimping
-  Hex crimping
-  8in1
-  Opening spring
